

OneSixtyTwo Capital Appreciation Fund LP

For the month of January, the OneSixtyTwo Capital Appreciation Fund returned +1.4%.

As we have communicated in the past, our Fund seeks to provide consistent returns, irrespective of market conditions. In doing so, our clients have the opportunity to gain additional diversification benefits, reduce risk and add higher returns to their overall portfolio.

In a month where fears of the coronavirus significantly impacted financial markets, our fund remained unaffected due to this mandate.

Sincerely,

Your OneSixtyTwo Capital Team
